## FIREPLACE

Firstly, choose a fireplace that matches your design aesthetic. In a modern home, a linear fireplace built into a feature wall keeps things simple and stunning. In a traditional home, you may want to opt for a fireplace that will fit into a mantel. There are many different types of fireplaces available from gas and electric to wood burning and biofuel. Do your research to make sure you pick the one that best suits your needs.

## LIGHTING

When it comes to selecting the appropriate lighting for your living room, it can be tricky! If you have a formal space designed for gathering and conversation, we love a good statement piece. We must give credit to our clients, White Orchid Homes, for selecting the fixture in this project. The oversized glass ceiling light gives this room a sense of opulence.
